

— REVENUE LABS · FINANCIAL OPERATING SYSTEM

Your business. Under **control.**

The AI financial operating system that turns accounting data into daily decisions
— for the millions of real-world businesses flying blind between month-end
closes.

DEMO santanany7-hub.github.io/commandiq STAGE Pre-seed STATUS Product live · in active development

— THE PROBLEM

Operators run million-dollar businesses on gut and a monthly rear-view mirror.

QuickBooks stores the data. It doesn't answer the questions that actually run the business — so between accountant closes, owners are blind for 30+ days at a time. Exactly when cash and vendor mistakes happen.

"How much cash can I safely spend today?"

Q1

"Which vendors do I pay first this week?"

Q2

"What changed since last week — and does it matter?"

Q3

"Are we going to hit the number?"

Q4

— WHY NOW

Three curves just crossed.

01 — DATA

The ledger is finally open

QuickBooks Online is the SMB system of record — ~7M+ businesses — with a real API. The financial data is finally addressable.

02 — INTELLIGENCE

An AI CFO is now real

Grounded LLMs can reason over a company's actual numbers — not just chat. Advice, not autocomplete.

03 — PRESSURE

Every cash mistake stings

Thin margins and expensive money make financial control urgent. Operators feel the need daily.

The winning product isn't another dashboard. It's the layer that turns the open ledger and the new intelligence into a decision.

— THE SOLUTION

A command center that tells you what to do — not just what happened.

Bloomberg Terminal × Ramp × Linear × an AI CFO — simple enough to open every morning.

THE REFRAME

~~"Here is your financial data."~~

● What changed

● Why it matters

● What to look at

● What happens if you do nothing

● The next decision

That distinction is the entire product.

— THE PRODUCT

One score. Six control rooms. A CFO that never sleeps.

COMMANDIQ SCORE

One deterministic health index — revenue, margin, liquidity, payables, expense control — with the drivers behind it.

Command Center

Score, KPIs & a prioritized “Needs Attention” feed.

Cash & Obligations

Exactly how much you can safely spend today.

Vendors & AP

Aging, risk, and an explainable Payment Planner.

Performance

Revenue pace, projection & margin health.

Expense Watch

Where spend is outgrowing the business.

Action Board

Insight → owned operational work.

Ask CommandIQ (AI CFO) + Find Me Savings run across all of it — [explore the live product](#) ↗

— HOW IT WORKS

Live in ten minutes. No contract uploads. No rebuilding your books.

1 Connect QuickBooks

Secure OAuth. CommandIQ reads accounts, P&L, vendors, bills and payments — no manual setup.

2 The engine scores it

A deterministic financial engine normalizes the ledger and computes every metric — reproducible and explainable.

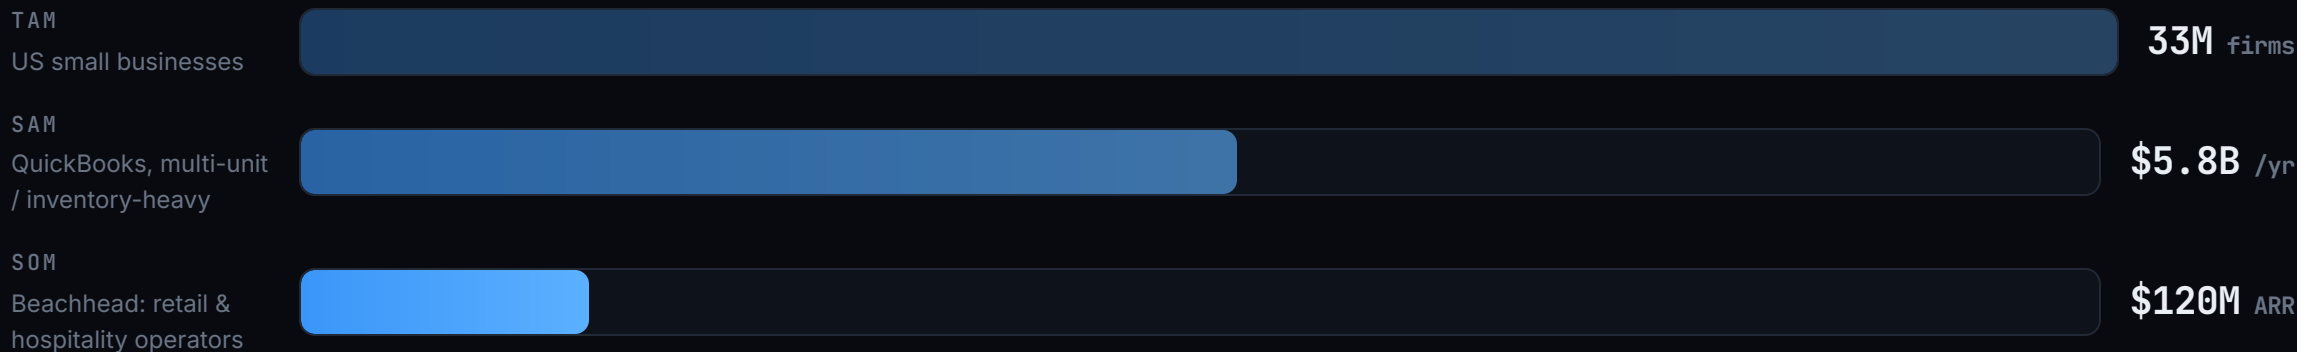

3 You get a command center

A live dashboard and an AI CFO that answers in plain terms — grounded in your real numbers.

✓ Every number is deterministic and testable. The AI is **grounded** in real figures — it never makes numbers up.

— MARKET

A large, addressable base — reached one operator category at a time.

Illustrative bottom-up: ~1.2M target businesses × ~\$4,800 ACV (SAM); ~25K beachhead operators (SOM). Assumptions, not guarantees.

— BUSINESS MODEL

Recurring SaaS. Land with the command center, expand into the system of record.

OPERATOR

\$199/mo

Single location. Score, cash, vendors, AI CFO.

COMMAND · POPULAR

\$499/mo

Multi-user, targets, payment planner, savings.

MULTI-UNIT

\$999⁺/mo

Multi-location roll-ups, roles, priority support.

— GO-TO-MARKET

Meet operators where their data already lives.

MOTION 01

Founder-led design partners

Hand-picked retail & hospitality operators. First partner live: **Torches NYC**.

MOTION 02

Accountant & bookkeeper channel

They deploy CommandIQ across their whole client book — one integration, many operators.

MOTION 03

QuickBooks App Store

Distribution at the exact moment of intent — inside the tool operators already open.

Wedge: the daily-open habit. Once CommandIQ answers “what do I do today,” it becomes the first tab every morning.

— WHERE WE ARE

The product is built and live.

MVP shipped & deployed

Six modules, live on the web — publicly demoable today.

Grounded AI CFO

Answers conclusion · evidence · impact · recommendation — from real numbers.

Deterministic engine, tested

Documented financial logic + a passing test suite.

First design partner onboarding

Torches NYC — Polanco Brothers Corp.

● Stage: Pre-seed

● In active development

QuickBooks-native · demo mode included

Everyone shows the past. We drive the decision.

QuickBooks stores it · spreadsheets go stale · spend tools own AP, not the whole picture · FP&A tools report, they don't tell you the next move.

— WHY WE WIN

The defensibility is in the decision layer.

01 — The decision layer

A proprietary scoring model and action workflow sit on top of the ledger. Competitors would have to rebuild the reasoning, not just the integration.

02 — Trustworthy AI

Grounded, deterministic answers earn the one thing finance software must have: trust. No hallucinated numbers, ever.

03 — Integration breadth

A roadmap that fuses financial + retail + customer + contractual data into one picture no point tool can match.

04 — Habit & data compounding

Daily use plus accumulating history make CommandIQ the system of record — and the harder it is to leave.

— THE VISION

From a QuickBooks command center to the financial OS for real-world business.

NOW

QuickBooks command center

Score, cash, vendors, performance, expenses, actions — and the AI CFO. Live today.

NEXT

Banking · contracts · payroll

Real-time cash, obligation intelligence, and true labor economics.

THEN

Retail & customer data

Point-of-sale and customer signals (Dutchie, Headset, Alpine IQ) fused with the financials.

VISION

One operating picture

Financial + retail + customer + contractual data — the single place operators run the business.

— TEAM

Operator-obsessed, and already shipping.

RL

[Founder name]

Founder & CEO, Revenue Labs — personalize this card.

BUILDING TOWARD

Founding engineer · design partner lead · finance/accounting advisor. Add teammates, advisors and logos here.

This slide is a template – replace the bracketed fields with your real team, advisors and any prior wins.

— THE ASK

Raising a pre-seed to turn a working product into a category.

\$1.5M

PRE-SEED · SAFE [CONFIRM AMOUNT]

~18 months of runway to first design partners on paid plans and a repeatable acquisition motion.
